STATISTICAL ANALYSIS PORTFOLIO

In this portfolio, you will find a collection of statistical analysis projects developed in R code, highlighting my experience with modeling, hypothesis testing, data visualization, and the interpretation of quantitative results. Please click the link to view my projects(<https://alexander71747.github.io>)

PROFESSIONAL EXPERIENCE

C2S-Medical Business Development LLC | Business Development Analyst [October 2023] - [Present]

- Assist in conducting market research to identify potential clients and emerging trends within the pharmaceuticals and dermo-cosmetics industry.
- Prepare reports and presentations to communicate findings and recommendations to senior management.
- Conduct secondary research on U.S. and Canadian pharmaceutical markets, including aesthetic treatments and patterns, and regulatory frameworks.
- Tracking and analysing key performance indicators (KPIs) to measure the effectiveness of business development efforts.

Toronto Metropolitan University | Research Assistant, Bridging Divides [April 2025] - [April 2026]

- Conducting quantitative analysis (such as regression analysis using R code) on migrant integration in Canada as part of the Canadian government-funded Bridging Divides program, supervised by Toronto Metropolitan University.
- Performed data annotation using Prodigy AI, labelling sentiment in text data to train an AI model. The annotated dataset focused on immigration-related opinions, helping the model learn to classify sentiments consistently.
- Conducted qualitative research comparing Canadian annual survey polls from 1991 to 2024 to track how public sentiment shifted over time, while compiling potential questions for our questionnaire.

University of Toronto | Research Assistant [April 2022] - [September 2024]

- Conducted research on the LGBTQ+ community in the Hellenic Republic in relation to the 2024 same-sex marriage bill approval, as well as on immigration and refugees crisis in Greece.
- Contacting directly Government officials and organizations for data collection.
- Translation of Governmental and non-governmental articles from Greek to English.
- Analysis and report of requested articles and topics.

EXTRACURRICULAR EXPERIENCE

Management Case Competition Team (MCCT) [September 2024] - [February 2025]

- Finalist in the CBV Institute's Business Valuation Challenge (BVC), ranking 4th among the top 30 Canadian university teams while representing the University of Toronto Scarborough MCCT (Management Case Competition Team).
- Developed stronger presentation and public speaking skills through team practice for university case competitions, and gained hands-on experience building discounted cash flow (DCF) valuation models for case competitions.

Member of the Scarborough—Rouge Park Constituency Youth Council [October 2022] - [January 2023]

- Collaborating with MP Gary Anandasangaree to discuss policy priorities and what could realistically be approved for Scarborough and across Ontario.
- Brainstormed and refined actionable ideas on Indigenous issues, education, and healthcare, helping shape proposals that could be advanced through parliamentary initiatives (including potential bills) under the guidance of MP Gary Anandasangaree.
